2. SCOPE

This Quality Management Manual applies to the French sites.

General scope of application:

ISO 9001 / EN 9100 / AQAP 2110 D, excluding UKAD et ECOTITANIUM:

DESIGN AND DEVELOPMENT OF MATERIALS GRADES, ENGINEERING, MELTING, ALLOYS REMELTING, MANUFACTURING, HEAT TREATMENT, INSPECTION, TESTING, MARKETING AND SALE OF METALLURGICAL PRODUCTS, OPEN AND CLOSE DIE FORGINGS, STAMPINGS, ROLLINGS IN ALLOYED AND STAINLESS STEELS, NICKEL AND COBALT-BASED ALLOYS AND SUPERALLOYS.

ENGINEERING, MANUFACTURING, HEAT TREATMENT, INSPECTION, TESTING, MARKETING AND SALE OF METALLURGICAL PRODUCTS, OPEN AND CLOSE DIE FORGINGS, STAMPINGS IN TITANIUM AND ALUMINIUM ALLOYS. MANUFACTURING AND SALE OF ALL GRADE PRODUCTS OBTAINED BY POWDER METALLURGY.

DISTRIBUTION AND WAREHOUSING OF METALLURGICAL PRODUCTS, ROLLINGS IN ALLOYED AND STAINLESS STEELS, NICKEL AND COBALT-BASED ALLOYS AND SUPERALLOYS.

MANUFACTURE OF TITANIUM ALLOYS INGOT.

INDUSTRIALIZATION, MANUFACTURING, INSPECTION, SALE, MARKETING AND INTERNAL TRANSFER OF TITANIUM ALLOY PRODUCTS. CUSTOM FORGING.

EN9120 - HEYRIEUX:

DISTRIBUTION AND WAREHOUSING OF METALLURGICAL PRODUCTS, OPEN AND CLOSE DIE FORGINGS, ROLLINGS IN ALLOYED AND STAINLESS STEELS, NICKEL AND COBALT-BASED ALLOYS AND SUPERALLOYS.

ISO 9001, EN 9100 - UKAD:

INDUSTRIALIZATION, MANUFACTURING, INSPECTION, SALE, MARKETING AND INTERNAL TRANSFERT OF TITANIUM ALLOY PRODUCTS. CUSTOM FORGING.

ISO 9001, EN 9100 - ECOTITANIUM:

MANUFACTURE OF TITANIUM ALLOYS INGOT.

This Quality Management Manual defines all the measures implemented by AUBERT&DUVAL to meet the requirements of the quality standards for the sites and scope specified in the following table:

Information on the legal status of these entities is available on:

https://www.infogreffe.fr/

Depending on the site, additional provisions (specific procedures and/or Quality Assurance Plans) are intended to take into account specific requirements, such as:

- Nuclear Industry standards: GSR Part 2 (IAEA), 10CFR21, RCC-M, NCA 3800 (ASME), NSQ-100, ISO 19443 (§ 8.3 not applicable), ...
- The NF IN ISO/CEI 17025 for our COFRAC-accredited laboratories
- The AS13100 aerospace standard for Aero Engine Design and Production Organizations
- AC7006, AC7101, AC7102, AC7108 and AC7114 for our special processes accredited by PRI NADCAP.

Quality Management commitments are effectively implemented through the processes listed in the mapping presented in Chapter 6 and described in Chapter 7.

For the nuclear market, specific provisions are described in the Nuclear Quality Manual.

The latest version of the Aubert & Duval Management Manual, which takes into account significant changes that may affect the effectiveness of the Quality Management System, in line with the strategic direction, is available to our customers and all interested parties on the following websites:

Aubert & Duval

3. QHSE POLICY

Quality - Health & Safety - Environment

Aubert & Duval and its subsidiaries are a leading European company covering the entire value chain, from the development of innovative and environmentally responsible materials to the production of semi-finished parts for critical industrial markets, especially aerospace, energy, defence and nuclear.

Our corporate policy aims to satisfy our customers, employees and shareholders by making the safety of our employees and our products and the fight against global warming our top priorities, as well as contributing to the national sovereignty.

Our management system will reflect these priorities in our quality, health and safety, environment policy:

By relying on process-based management, a risk prevention approach and compliance with benchmarks and internal and external standards.

By developing **exemplary management** by accepting the right to make mistakes and the need for transparency.

By strictly respecting ethical behaviour and the requirements and rules of the management system.

By ensuring the **involvement** of employees and their representatives.

By seeking **excellence** and zero defects by developing a spirit of continuous improvement in all areas of the company.

Our QHSE objectives:

QUALITY

We are aware of the criticality of our products for aeronautical, energy, nuclear and defence applications. For this reason we are committed to implementing an ambitious **Quality policy** and to being **exemplary** in terms of **Safety** and **Quality**.

We work to develop and deliver robust, highperformance products that meet our customers' requirements.

To this end, all our activities are conducted in a spirit of transparency, progress and risk management.

ENVIRONMENT

We are committed to innovating, proposing and implementing environmentally responsible production solutions. We are committed to continuously improve our impact on the environment and natural resources, including through recycling.

We develop the materials of the future to help our customers achieve their decarbonisation objectives.

HEALTH & SAFETY

The health and safety of all our employees, contractors and subcontractors is our top priority. We commit you to being concerned and fully involved in the prevention and protection of your own and your colleagues' health and safety at work.

We are working to develop a **safety culture** with the objective of α **zero accidents** α . We are also committed to working tirelessly on prevention and improving working conditions. We develop the policies, procedures and tools necessary for the continuous improvement of our performance.

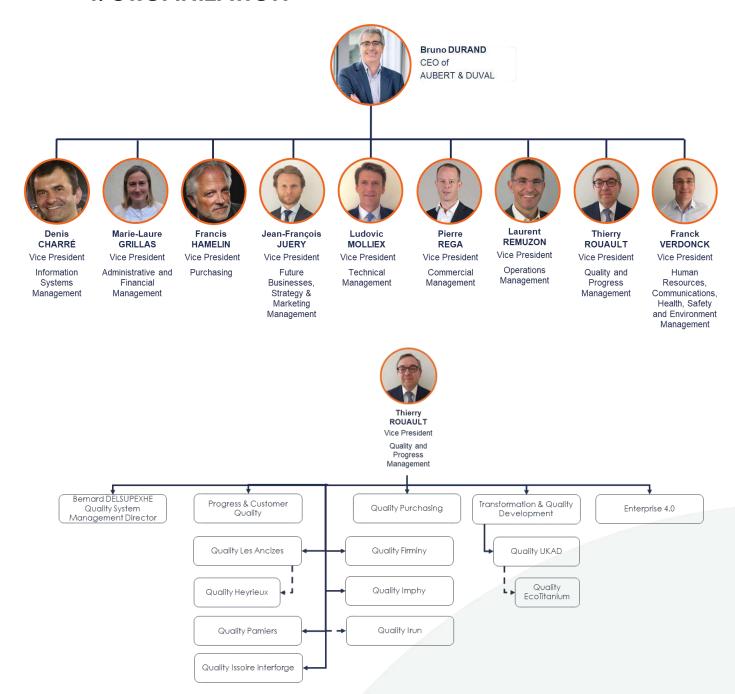

The success of this policy depends on everyone's mobilization and commitment

4. ORGANIZATION

Mr T. ROUAULT has been appointed as the Management representative within the meaning of the Quality guidelines.

5. COMPANY AUTHORITY

The system of delegated authorities defines the decision rules for the main commitment processes of the entities. The authorisation rules defined in the MAS (Company Authority Handbook) make it possible to establish commitment authorisations formalised by the authorised person(s) according to the planned activities and amounts.

6. PROCESSES MAPPING

Our management system is defined by 8 processes and their interactions.

Our processes are identified as follows:

• 2 Management process

P1: Defining and implementing the strategy

P8: Health & Safety / Environment risks controlling

3 Realization process (our activity)

P2: Designing / Developping / Industrializing

P3: Selling parts and semi-finished products

P4: Manufacturing and delivering parts and semi-finished products

3 Support Process (resources for other processes)

P5: Managing skills

P6: Purchasing

P7: Managing the infrastructures

7. PROCESS IDENTITY CARD

Each process has an "identity card" with the following information:

- Its purpose,
- The steering bodies,
- The activities with input and output data,
- The means, resources, standards and indicators necessary for its proper functioning

Below is the "identity card" for each process:

<u>PURPOSE:</u>
Optimize the use of resources in order to achieve value creation objectives, within the sustainable development framework, via the selection of ambitious and realistic strategic goals so as to satisfy our customers and other interested parties

MEANS / EQUIPMENT (with what?):

Infrastructure (building, information system ...)

RESOURCES / SKILLS (With whom?):

LEADER: B. DURAND

Contributors: Customers, Interested Parties including all staff, Comex

Context: External and internal stakes
Relevant Requirements of Interested Parties
AD Group: Vision - Ambition - Strategic priorities - Values - Ethics charter
- CSR approach

- CSR approach
Financial results N-1 / N-2; markeling study
P3: Market evolution and current positioning; customer needs and
expectations; positioning and evolution of competition
P4: industrial ic Capacifies / Capabilities is
P7: Investment plan (Capex), investment budget N+1
P8: Assessment of professional risks [EVRP], environmental analysis (AE),
Industrial Risks (HSE)
All processes: R&O analysis, level of progress of objectives; Customer
requirements, legal and regulatory and those of other interested parties

ACTIVITIES:

- Structure, prepare and validate Operational Plan and Determine and allocate necessary resources Define responsibilities, roles and authorities

- Manage communication (external and internal)
- Manage internal audits
 Coordinate steering bodies at Group level, process review and Quality Management Review

OUIPUS:
All processes: SWOT, RIP RAG, Operational Plan / Budget validated, QHSE Policy, QHSE objectives / action plan, Use of the Professional Alert system, Majorindustrial, use of the whistleblowersystem, communication plan suitable to the goal, company strategy
PS: RIB Dasses industrial Design »
PS: Allocation training budget / employment plan
PS: Validation of investment plans (Capex) including IS, major industrial projects, etc.

INDICATORS (With which means of measurement?):

- Ebitda (M€)
 FCF (M€)
- Customer satisfaction index (/20)

PROCESS STEERING BODIES: COMEX, Process Review, Quality Management Review

PROCESS IDENTITY CARD P2 - DESIGNING / DEVELOPPING / INDUSTRIALIZING

PURPOSE:

Design and development of materials grade
Design (Process), develop, industrialize new products, processes, related services

§ 8.3 ISO 19443 Not applicable

MEANS / EQUIPMENT (with what?):

Infrastructure (buildings, information system \ldots), test equipment, design and simulation software \ldots

RESOURCES / SKILLS (With whom?):

LEADER: L. MOLLIEX

Contributors: COMEX, Multidisciplinary teams: Commercial, Financial, Technical Platform and Methods, Quality, Industrial, Maintenance, Procurement, Metallurgy Sector, R&D

INPUTS:

Customers: Customer Specifications including special standards
P1: SWOT, RIPRAG, validated Operational Plan / Budget, QSSE Policy,
QSSE Objectives / Action Plan, Use of the whistleblower system,
Available information, adapted communication plan on the company's
purpose and strategy, Axes I&D
P3: Need for innovation & development emanating from customers,
Lessons Learned and legal and regulatory requirements
P4: Customer complaint, qualify anomaly
P8: Requirements applicable to staff
Expert application files

ACTIVITIES:

- Innovation: portfolio of new development ideas Industrialization of new products:
 Plan and execute the process development
 - phases Carry out design and validation reviews
- Obtain customer approval
 Validate life-cycle of series

 Manage changes in manufacturing processes (Process)
- Define areas of technical expertise and associated

OUTPUTS:

Customers: initial samples, qualification report and customer

PROCESS STEERING BODIES: COMEX, Technical Steering Committee , Technical Management Committee , Meeting T/T+1, GAMT-Medium-Term Action Group, Expertise Committee meetings, Process

PROCESS IDENTITY CARD P3 - SELLING PARTS AND SEMI-FINISHED **PRODUCTS**

<u>PURPOSE:</u>
Achieve sales targets in order to attain sustainable turnover and expected profitability

MEANS / EQUIPMENT (with what?):

Infrastructure (building, information system ...), storage area and

RESOURCES / SKILLS (With whom?):

LEADER: P. REGA

Contributors: Commercial, Technical, Finance, Quality Managements, Industrial Operations Management, Legal Department

Customers: Tender / Customer Order, defined requirements, portals, standards, complaint

standards, Cornipolare.
Finance Management: Credit Management / Credit Insurance
P1: SWOT, RIP RAC, validated Operational Plan / Budget, QSSE Policy,
QSSE Objectives / Action Plan, Use of the whistleblower system,
Available information, adapted communication plan on the company's

purpose and strategy P2: New products

P4: Tonnages and/or Parts Shipped and invoiced, Completed customer complaint file. "Customer Scorecard" action plan

ACTIVITIES:

- Process all consultation queries (tender or not)
- Analyze feasibility, function, risks, value and establish an offer
- Process orders and contracts (ARC)
- Record customer complaint and send reply
- Archive customer files
- Measure and analyze customer satisfaction / Processing "customer performance" analyses (Scorecard)

OUTPUTS:

- Cuslomers: Offer / Contract / AR Order ; Response to complaint Finance Management. Material coverage P1: Customer Satisfaction Survey carried out P2: Need for innovation & development P4: S&OP data; order for production planning; Request for processing of complaint / Customer Scorecard

 Rate of Overdue (%)

PROCESS STEERING BODIES: COMEX, Process Steering Review, Process Review

PROCESS IDENTITY CARD MANUFACTURING AND DELIVERING PARTS AND SEMI-FINISHED PRODUCTS

<u>PURPOSE:</u>
Ensure commitment to customers by guaranteeing the production of a product, compliant in terms of: time, quality and quantity

MEANS / EQUIPMENT (with what?):

Infrastructure (buildings, information system ...), measuring and testing equipment, tools, production facilities, self-propelled carts,

RESOURCES / SKILLS (With whom?):

LEADER: L. REMUZON

Contributors: COMEX, Site Management, Supply Chain, Quality, Process, Maintenance, Producer, Operational Excellence, Purchases

INPUTS:

INPUTS:

P1: SWOT, RIP RAG, validated Operational Plan / Budget, QSSE Policy,
QSSE Objectives / Action Plan, Use of the whistleblower system,
Available information, adapted communication plan on the company's
purpose and strategy
P2: Manufacturing documents (instructions, monitoring plan, operating
method...): / Manufacturing / control tools and NC programs,
dissection plan
P3: SOP data, order-Request for complaint processing / Customer
scorecard

scorecard **P6:** Products, materials, supplies, services received **P7:** New equipment and capable machines

ACTIVITIES:

- Plan production (S&OP/MPS); launch MO (manufacturing orders)
- Manufacture and products inspection
- Manage and plan subcontracted production activities
- Manage shipping and invoice Validate and monitor special processes Process complaints / Deviations / NOE / Customer
- Scorecard Improve Q/C/D

OUTPUTS:

Customers: request for deviation and NOE
P1: Quality reporting
P3: Tonnages and/or Parts Shipped and invoiced; completed customer complaint file: "Customer Scorecard" action plan
P7: Expression of needs (investment)

 Inventory and work-in-progress (Met)

PROCESS STEERING BODIES: COMEX, Operation CODIR, Plant Performance Review, PIC, Process Review

PROCESS IDENTITY CARD P5 - MANAGING SKILLS

<u>PURPOSE:</u>
To make available competent and committed human resources in order to contribute to the performance of the company and the satisfaction of our customers

MEANS / EQUIPMENT (with what?):

- Infrastructures (buildings, workspaces and work life ...) Training actions and training organizations
- HRIS
- Recruitment firms
- HR and social engineering consultants Temporary work agency

RESOURCES / SKILLS (With whom?):

LEADER: F. VERDONCK

Contributors: COMEX, Talent Department, Social Development Department, HR network, Communication Management, Team Development Department, Cata HR, staff, Occupational Health Service, Expertise Committee

INPUTS:

INPUTS:

Labour regulations, collective agreements
P1:SWOT, RIP RAG, validated Operational Plan / Budget, QSSE Policy,
QSSE Objectives / Action Plan, Use of the whistleblower system,
Available information, adapted communication plan on the company's
purpose and strategy
All HR processes; job description,
Organizational chart, annual appraisal interviews, career interviews,
competency frameworks, training needs, salary evaluations
Training: ethics, quality, safety, environment,
Social Climate Observatory Survey

ACTIVITIES:

- Manage the evolution of the workforce and target organizatio
- Manage the Employment and Expertise Plan
- management system Recruit and intergrate required profiles
- Manage skills development
- Manage the Expertise Convention and the "expertise"
- business line
 Organize and implement internal mobility, career plans
- and succession schemes
- Implement employee training actions
 Manage compensation and benefits
 Managing the social climate

OUTPUTS:

All processes: competent personnel in term of QHSE
Job descriptions
Skills assessments
Skills mapping
Employment contract
Skills development plan
Staff points, managerial staff review, succession plans, Salary
review

aview Collective agreements ocial climate favorable to employee performance

PROCESS STEERING BODIES: COMEX, HR Meeting, Process Review

PROCESS IDENTITY CARD P6 - PURCHASING

PURPOSE

Fourtrainse a panel of high-performance suppliers which enables the procurement of products and services that meet our requirements in terms of Quality, Cost and Time

MEANS / EQUIPMENT (with what?):

Infrastructure (building, information system ...)

RESOURCES / SKILLS (With whom?):

Contributors: Product Application, Finance, Quality, Industrial, Process, Buyers

INPUTS:

All processes: Need for new « critical suppliers / products » (Competitive

P1: SWOT, RIP RAG, validated Operational Plan / Budget, QSSE Policy, QSSE Objectives / Action Plan, Use of the whistleblower system, Available information, adapted communication plan on the company's purpose and strategy

P4: Net needs (Example MRP...)
P7: Investment file

Suppliers: Products, raw materials, supplies, services ...: Quotation

ACTIVITIES:

- Find and Approve a new supplier
- Order / Supply / acceptance of products, materials,
- supplies and services
 Process Supplier complaints
 Evaluate Supplier (time, quality, cost, identification, logistical capacity)
- Optimize purchase costs
- Audit of suppliers
- Optimize risk management

OUTPUTS:

All processes: Lists of approved suppliers; Supplier complaints cleared; Make available to internal customers; Supplier quotation and performance results (quotation sheets, Monitoring Supplier's Time-Quality for critical products and Supplier Quality Assurance Purchase Action Plans)

Suppliers: Order / contract; Supplier quotation results
